iRejuvenation

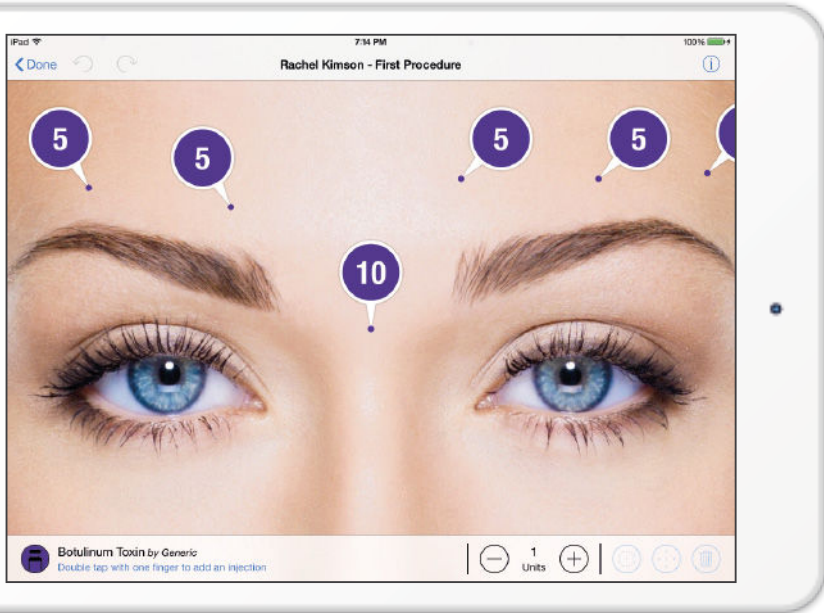

Assistant for Facial Injections
& Rejuvenation Procedures

Designed by professionals for professionals, **iRejuvenation** helps you to **report facial injections** procedures, to compare them over time and **export PDF files** that can be easily inserted into the patients' files.

Available on the
App Store

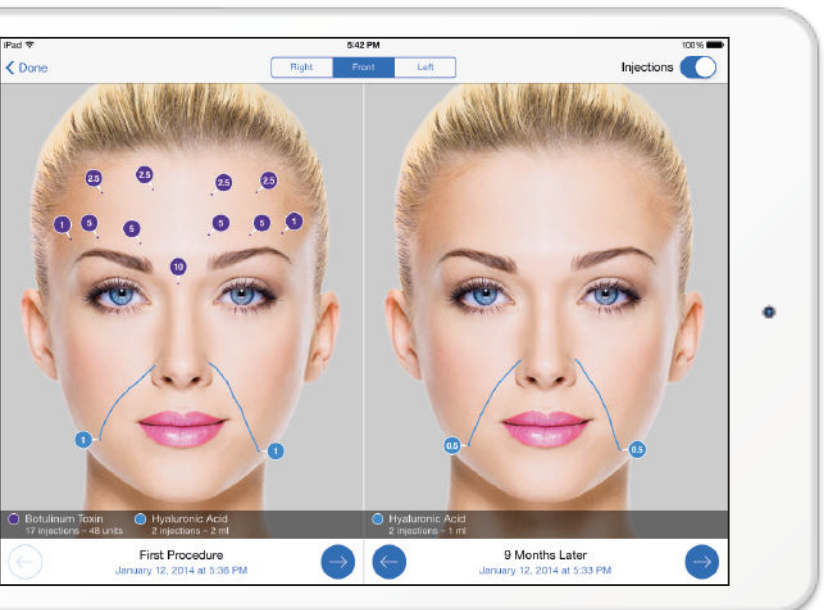

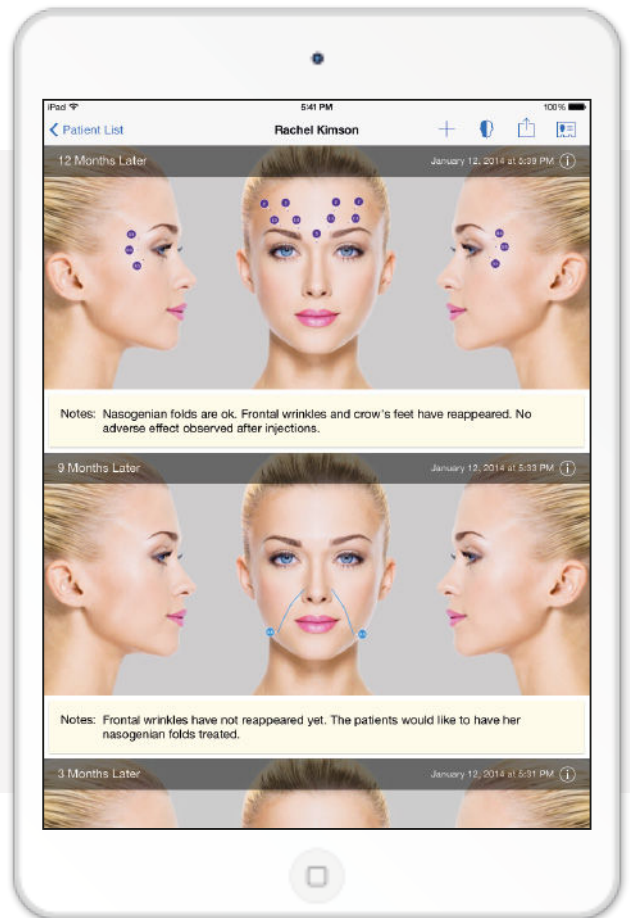

Save time Report Procedures

iRejuvenation uses the latest technologies available to give you the most effective way to report injection shots.

Cosmetic Timeline & Medical Information

Regular picture taking through iRejuvenation will lead to the establishment of a "cosmetic timeline" of patients hence allowing the accurate analysis of the evolution of patients' facial features as well as the impact of cosmetic interventions.

Compare Faces Face Evolution

The iRejuvenation Compare Tool allows to show patients the evolution of their faces throughout the rejuvenation process.
